SPECIFICATION GUIDE – HALO GLASS

Features

By combining the principles of our core glass processes ‘veil’ and ‘formed’, we sculpt the glass surface by carving up to 3mm deep then kiln fire the glass to soften the shape and texture of its surface.

HALO’s jewel like appearance is a result of its dual translucencies, and its softened 3D form. Available in annealed glass, or laminated safety glass in custom sizes, HALO can also be supplied with bespoke printed interlayers, colour backed or even mirrored.

Manufacturer: Axolotl Group Pty Ltd

Process: Halo

Glass type: Clear, Low Iron, Bronze, Grey, Green, Starfire

Treatment: Toughened, annealed, toughened laminated, annealed laminated, toughened/annealed laminated, heat strength.
